11. Total number of shares issued.

1,288,573.

12. Number of shares now in treasury or otherwise unissued.

671,427.

13. Particulars of any issued shares held in trust for the Company or donated for treasury purposes.

40,000 shares surrendered to company and share capital reduced from 2,000,000 to 1,960,000 in 1947.

14. Date of last annual meeting.

April 15, 1957.

15. Date of last report to shareholders.

March 21, 1957.

16. Details of any treasury shares (or shares issued subject to payment or shares held for the benefit of the treasury) now under option or the subject of any underwriting or sales agreement. If none, this is to be stated.

By agreement dated April 3, 1957, the Company granted Lawrence C. Smith, General Manager, an option to purchase 100,000 treasury shares at 40 cents per share, which option may not be exercised before one year from date of option; and, in respect of no more than 20,000 shares before December 31, 1958; 40,000 shares before December 31, 1959; 60,000 shares before December 31, 1960; 80,000 shares before December 31, 1961; 100,000 shares before December 31, 1962. The option was granted to this employee as an Incentive Share Option.

(Note.—Since the date of this listing statement the Company has received \$175,000 from the sale of 500,000 treasury shares at 35 cents per share. See Supplemental Financial Information on page 5.)

17. Details of any shares pooled, deposited in escrow, non-transferable or held under any syndicate agreement or control.

None.

18. Details of any registration with or approval or authority for sale or granted by or any filing with a Securities Commission or corresponding Government body.

Prospectuses filed with Registrar of Joint Stock Companies, Province of Alberta, dated September 28th, 1945, and November 5th, 1945.

19. Has any application for registration with, or approval or authority for sale by or any filing with a Securities Commission or corresponding Government body ever been refused, cancelled or revoked? If so, give particulars.

No.

20. Particulars of any bonds, debentures, notes, mortgages, charges, liens or hypothecations outstanding.	None.														
21. Enumerate fully, giving claim or property numbers, approximate acreage, townships and mining camp or oil field: (a) Properties owned where titles vested in Company. (b) Properties leased. (c) Properties otherwise held. Give particulars of title held by the Company in each instance (e.g. patented, unpatented, Crown granted, held under mining license, perpetual lease, etc.)	None. AUDITORS' REPORT

To the Shareholders of
Jumping Pound Petroleums Limited.

We have examined the balance sheet of Jumping Pound Petroleums Limited as at December 31, 1956 and the statements of profit and loss and earned surplus for the year ended on that date, and have obtained all the information and explanations we have required. Our examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion the accompanying balance sheet and statements of profit and loss and earned surplus are properly drawn up so as to exhibit a true and correct view of the state of the affairs of the company as at December 31, 1956, and the results of its operations for the year ended on that date, according to the best of our information and the explanations given to us and as shown by the books of the company.

GEOLOGIC REPORT ON ACREAGE INTERESTS

Introduction

This report consists of a geologic summary of three groups of acreage interests held by Jumping Pound Petroleum Limited in Alberta and southwestern Manitoba.

Occurrences of oil in adjacent areas are noted and the significance of these is considered with respect to Jumping Pound Petroleum's acreage.

Beddington Area, Alberta

GENERAL LOCATION -	Twps. 25 and 26, Rges. 1 and 2, W5. Twp. 28, Rge. 3, W. 5th M.
ACREAGE - - - -	Approximately 4,280 acres.
INTEREST - - - -	Gross royalties ranging from 1% to 6%.

This royalty spread just north of Calgary, is in an area currently the scene of considerable active exploration for Cardium Rundle formation (Turner Valley pay) and Devonian Crossfield member oil. Companies holding petroleum rights and carrying out exploration on this and adjacent acreage are Western Leaseholds Limited, Shell Oil Company and Home Oil Company Limited.

The most important discoveries in the vicinity are the Socony Kathryn Devonian Crossfield member gas find in 1954 in Section 3, Township 26, Range 28, West of the Fourth Meridian. The gas flow was small, 1,500 mcf, but it indicated the potentiality of the horizon. In 1956 Western Leaseholds Limited also found a similar amount of gas in the Crossfield member prior to completing the well as a Cardium oil well in Lsd. 8, Section 34, Township 25, Range 1, West of the Fifth Meridian.

Geology

TABLE OF FORMATIONS

CRETACEOUS	MISSISSIPPAN	DEVONIAN	CAMBRIAN
Edmonton	Livingstone	Wabamun	PRECAMBRIAN BASEMENT
Belly River	Shunda	Jefferson	
Bear Paw	Pekisko	Beaverhill Lake	
Colorado	Banff	Elk Point	
Blairmore	Exshaw		

With reference to the above Table of Formations, potential producing horizons are as follows:

The Jefferson formation of the Devonian is porous throughout the area and although the history of performance of this formation is not locally encouraging it must be considered a potential petroleum section especially where associated with any seismic anomaly or structure.

The Crossfield member of the Wabamun formation is a local porous development and commonly yields moderate flows of gas. It will be well developed under most of Jumping Pound Petroleum's Beddington interests and is therefore likely to yield gas flows in the order of those described above at the Socony Kathryn and Western Beddington wells and under slightly improved conditions somewhat larger.

The "Turner Valley" or Elkton pay of the Livingstone formation has proven a good producer of both oil and gas in the Sundre-Elkton fields about 30 miles northwest along strike. No discoveries or important shows have been recorded in the Beddington area but flows of salt water in drill stem tests of this section indicate that excellent conditions of permeability and porosity may be expected in the area. The occurrence of an erosional high or structure on the Paleozoic unconformity (the top of the Livingstone) would be a most favourable circumstance as such a trap would probably result in the accumulation of oil and/or gas in the Livingstone formation of this area.

The Basal Cretaceous sand at the base of the Blairmore commonly yields small gas flows in the area and while it is not attractive in itself, is a secondary objective to be considered in any exploration program.

The Cardium formation, a sandstone in the middle of the Colorado formation, is perhaps the most interesting potential producing horizon to be considered with respect to these interests. It is relatively shallow, about 6,000 feet, and commonly yields shows and small oil wells in the area. The better acreage here with respect to the possibilities of the Cardium will be the more westerly parcels.

Exploration in this area should be based on regional sub-surface studies. Such a study if done in all possible detail should be sufficient to select drilling locations designed to test the Crossfield member of the Wabamun formation and the Cardium formation. However, subsurface geology cannot be the final analysis in selecting locations to test the "Turner Valley pay" of the Livingstone formation. Seismic surveying must be employed to find the topographic highs on the Paleozoic unconformity which control accumulation in this horizon. Further, seismic surveying can be of some aid in prospecting for Crossfield member production.

Southwestern Manitoba

GENERAL LOCATION	- Twps. 1 and 2, Rges. 18, 19, 21 and 22, W2.
ACREAGE	- - - Approximately 48,000 acres.
COMPANY INTEREST	- Full petroleum rights carrying a 5% gross override.

This spread of freehold and Crown petroleum leases lies on the general strike of the Verdun-Daly-Woodnorth, Whitewater and Lulu Lake fields which obtain production from the Lodgepole and Mission Canyon formations. The limit of the Mission Canyon formation strikes about 20 degrees west of north approximately through the Lulu Lake field at the east side of Township 1, Range 21, W2. Acreage lying east and northeast of the Lulu Lake-Whitewater trend will have to rely on Lodgepole and deeper formations for production.

Geology

TABLE OF FORMATIONS

CRETACEOUS	DEVONIAN
Vermillion River group	Englewood
Ashville	Lyleton
Swan River	Jefferson
JURASSIC	Manitoba group
Gypsum Springs	Winnipeg
MISSISSIPPIAN	Ashern
Mission Canyon	SILURIAN
Lodgepole	Interlake group
Exshaw	ORDOVICIAN
	Stony Mountain
	Red River
	Winnipeg

With reference to the above Table of Formations, potential producing horizons underlying the Company's southwestern Manitoba spread are as follows:

The coarse porous sandstones of the Winnipeg formation offer an attractive reservoir but are not known to be petrolierous in the area. In any well carried into the overlying Red River formation, consideration should be given to testing the Winnipeg.

The Red River formation is a porous fossiliferous dolomite which has given oil shows in several places in southwestern Manitoba. It is a highly attractive formation and would be a primary objective where associated with any deep seismic feature.

Imperial Oil Limited recently reported some shows in the Stonewall formation of the Interlake group in southeastern Saskatchewan and a discovery in this formation is reported from adjacent North Dakota. It is a sequence of marine dolostones and sandy shales and is locally porous. In the updip regions of southwestern Manitoba it may be a highly potential petroleum producing horizon.

The Devonian sequence is currently yielding occasional shows in southeastern Saskatchewan and the Manitoba group and Jefferson formation are interesting where porous although the general history of performance of the Devonian in the region is not so far encouraging.

The only important production to date in the area is from the Lodgepole and Mission Canyon formations. Porous crinoid beds of the Lodgepole formation which are sealed updip by anhydrite and Paleozoic unconformity provide the reservoir in the Verdun-Daly area while Mission Canyon production is found occurring under similar circumstances southeast along strike.

Seismic surveys have been conducted over the acreage and on the basis of this work two locations have been selected. These locations lie on seismic anomalies of the type commonly associated with production in the region. A third location has been selected from regional subsurface studies with some support from seismic.

Pincher Creek Area, Alberta

LOCATION	- - - - N½-12-5-1, W5
ACREAGE	- - - 319 acres
COMPANY INTEREST	- Petroleum and natural gas Crown lease

This halfsection lies within the foothills belt about 8 miles northwest of the Pincher Creek gas field and west of the strike of that field. Such acreage is dependent upon the deep Mississippian "Turner Valley pay" and deeper Devonian carbonate sequences. No Cretaceous production can reasonably be expected. This parcel must be regarded as protection acreage against the possibility of an extension of the Pincher Creek field or a new discovery in the vicinity.

NATURAL GAS, ETC., RESERVES IN JUMPING POUND FIELD

4404 Coronation Drive,
Calgary, Alberta, Canada.

April 26, 1957.

Jumping Pound Petroleums Limited,
304 Sixth Avenue West,
Calgary, Alberta.

Gentlemen:

Pursuant to your request, I have prepared an estimate of the natural gas, condensate, natural gasoline and sulphur reserves of the Jumping Pound Petroleums Limited interests in the Jumping Pound field. I did not have available, sufficient detailed well information from the operator, Shell Oil Company, which would permit a detailed evaluation of the natural gas reserves of the Jumping Pound field, Alberta, Canada. I did, however, have available, a report dated January 31, 1957 from the Alberta Petroleum and Natural Gas Conservation Board entitled "Natural Gas Reserves of the Province of Alberta and Other Related Data" from which the Estimated Original Gas in Place for the field was obtained. Jumping Pound Petroleums Limited natural gas reserves were derived from this figure. The condensate, natural gasoline and sulphur reserves were obtained by applying appropriate recovery factors. I have therefore estimated Jumping Pound Petroleums Limited 2.07851% royalty interest in the Jumping Pound gas field to be as follows, as of April 1, 1957;

Marketable Gas Reserves.....	MMcf.....	10,820
Condensate Reserves.....	Barrels.....	86,560
Natural Gasoline Reserves.....	Barrels.....	8,870
Sulphur Reserves.....	Long Tons....	1,490

The natural gas produced from this field is currently being sold by the Shell Oil Company, as operator, to the Canadian Western Natural Gas Company.

The extent and character of ownership and all other factual data supplied by the Company were accepted as represented.

Yours truly,

"M. P. PAULSON"

Professional Engineer of Alberta.

CERTIFICATE OF QUALIFICATION

I, Maurice Palmer Paulson, Petroleum Engineer, of 4404 Coronation Drive, Calgary, Alberta, hereby certify;

1. That I did prepare a report upon certain properties of Jumping Pound Petroleums Limited during the month of April, 1957.
2. That I personally have no direct or indirect interest nor do I expect to receive any direct or indirect interest in the properties of Jumping Pound Petroleums Limited or in any securities of that Company and that I am not a shareholder of that Company.
3. That I attended the University of Oklahoma in the years 1937, 1938, 1939, 1940, 1941, 1942, and that I graduated with a Bachelor of Science degree in Petroleum Engineering from the University of Oklahoma, that I am a registered Professional Engineer in the Province of Alberta, that I am a member of the Canadian Institute of Mining and Metallurgy and that I have in excess of twelve years' experience within the Petroleum Industry of Western Canada.
4. That the aforementioned report was not based on a personal field examination of the properties inasmuch as such examination was deemed unnecessary in view of the information available.

"M. P. PAULSON",

Professional Engineer of Alberta.
